PRIDE Environmental Education Grant Program

PRIDE – *Personal Responsibility In a Desirable Environment* – The PRIDE initiative promotes Personal Responsibility In a Desirable Environment in 42 counties in southern and eastern Kentucky. PRIDE unites citizens with the resources of federal, state and local governments in order to:

1. Improve water quality in the region.
2. Clean up illegal trash dumps and other solid waste problems.
3. Promote environmental awareness and education.

Environmental education is a life-long learning process that encourages understanding of and actions beneficial to the environment. The goal of environmental education is to create environmentally literate citizens who are prepared to make wise decisions. The preservation of Kentucky's resources for generations to come depends on the effectiveness of these citizens and the environmental education process.

There are three components of environmental education. One component is awareness of nature and of conflicts between the built and natural aspects of our environment. Environmental learners must move past this awareness and develop basic understandings of ecology and also human driven processes such as agriculture, mining, energy production, economics, legislative procedures and much more.

The second component includes a vast array of conceptual learning. PRIDE's education initiatives include environmental education curricula supplements including Project WET, Project WILD, Project Webfoot and Project Learning Tree and outreach programs for schools and PRIDE Clubs.

To prepare for the third component – taking positive and responsible action on behalf of the environment – learners must acquire and practice skills such as those involved in critical thinking, values clarification, issues investigation, effective leadership, group interaction, environmental research methods, general problem solving and much more. Positive environmental actions should originate with the action taker and may be private, involving subtle changes in an individual's lifestyle, or these actions may be highly visible. These actions also may be done alone or with the support of others. In either case, the actions are based on information from all points of view and are carried out effectively because of the skills that were practiced in the environmental education process.

Programs in environmental education should have a focus that is appropriate for the learning level of the learner. Younger children may dwell on awareness activities, begin to learn concepts at a level that is appropriate for them and practice the simplest of skills. Older students, who should be well versed on concepts, can concentrate on the more complex skills and practice taking more complex, positive group action on behalf of the environment. Global environmental issues should be focused upon after local and regional issues have been studied. This point is crucial. The focus of PRIDE is to help students learn more about their local environment and regions.

Grant Preparation Tips

- a) Make sure that the written description of your project is very specific as to how the project meets the goals of environmental education. Include how your goals will be measured (for example, energy conservation projects can be measured by showing decrease in electric costs). Projects should be geared toward educational use and not beautification. Projects focusing on energy efficiency, recycling and solid waste management will be given highest priority.
- b) Approach other funding sources and citizen groups as soon as possible to build the coalition for your Grant project; decisions to participate in your project could take some time. Strong consideration will be given to groups that will use supplemental materials, labor or dollars for this project (i.e. donations, volunteer labor, other Grants, PTA involvement, school funds).
- c) Unless you know exactly what you want to do with the Grant, it may be helpful to brainstorm several alternative ideas at first. It is advantageous to work with other groups and agencies that are participating in the project to prepare the best proposal. Joint proposals from a team of teachers are welcome.
- d) When requesting Grant funds to purchase books, we ask that you choose books from PRIDE's approved booklist. You may access the approved booklist on the PRIDE website at www.kypride.org. If you wish to purchase a book not listed, you must submit the book information for approval prior to purchasing. Please include; book title, author, publishing company and purchase information.
- e) **The grant period will extend from October 1, 2015 to March 30, 2016. All materials will be required to be purchased by March 30, 2016; no extension will be given to spend funds.**
- f) An example Grant budget is attached (see Budget Form Example, on page 11).
